

PHYSICIAN PROFILE/CASE LIST

Your application will be considered incomplete without this information.

Please provide a list of cases (patient names not required) from the current hospital or facility of main affiliation for the last two (2) calendar years, or residency training logs if a recent graduate, documenting your clinical work. The report must include the name of the procedure and/or diagnosis. We are unable to accept reports with procedure and/or CPT codes only.

- For **surgical specialties**, this includes a listing of surgical procedures performed and complications noted, if any, for whom you were the responsible party (either as admitting, attending, or consulting surgeon) from the hospital/facility of main affiliation for the last two (2) years, or training logs if a recent graduate.
- **Dentists** without hospital experience shall submit a list of cases documenting their clinical experience and procedures performed for the last two (2) years, or training logs if a recent graduate.
- For **non-surgical specialties**, this includes a listing of principle diagnoses with complications noted, if any, for whom you were the responsible party (either as admitting, attending, or consulting physician). Depending on the privileges requested, a listing of procedures performed may also need to be provided in addition to the principle diagnoses report.

A physician profile is required in order to determine your clinical/surgical experience in relation to the privileges you have requested. This information is generally available from either Medical Staff Services or the Medical Records Department of most hospitals/facilities.

In the event the applicant is unable to document appropriate hospital/facility activity as outlined above, the applicant shall provide documentation sufficient to explain the lack of requisite hospital/facility activity as well as documentation of current clinical competence.

If you have any questions, please contact Medical Staff Services at 325-670-2258.
